JOURNAL OF ELECTROANALYTICAL CHEMISTRY AND INTERFACIAL ELECTROCHEMISTRY, VOLUME 216 (1987)

SUBJECT INDEX

Ammonia,
taking advantage of liquid ——— to control the surface modification of silicon electrodes (Guyomard et al.) 101
Ammonia/ammonium chloride,
study on the mechanism of the electrochemical reduction of the cobalt–dimethylglyoxime system in ——— (Wenrui Jin, Kun Liu) 181

Cadmium,
on the adsorption of ———(II) ions on a HMDE from KF + thiourea aqueous solutions. A chronocoulometric study (Souto et al.) 273
The single crystal metal–non-aqueous solvent interface. Underpotential deposition of ——— on Ag (111) in propylene carbonate (Xing et al.) 261
Cadmium selenide,
photocapacitance spectroscopy of thin film ——— electrodes (Cocivera et al.) 41
Capillary tube technique,
new possibilities for obtaining more accurate results of self-diffusion coefficients by adapting the ——— (Molenat) 89
Chloranil,
ion-pair effects on the electroreduction and electrochromic properties of *ortho*-——— in dipolar aprotic solvents (Desbène-Monvernay et al.) 203
Chromium,
the analysis of dissolved Cr^{3+} with the rotating ring–disc technique and its application to the corrosion of ——— in the passive state (Haupt, Strehblow) 229
Chronoamperometry,
effects of resistance and capacitance on the ——— of polymer-coated electrodes as modeled by a finite elements digital simulation (Yap, Durst) 11
Cobalt–dimethylglyoxime system,
study on the mechanism of the electrochemical reduction of the ——— in NH_3/NH_4Cl (Wenrui Jin, Kun Liu) 181
Cobalt^{II}(cyclam),
dealing with unequal diffusivities among reactants in kinetic studies at rotating disk and ring–disk electrodes. The reduction of H_2O_2 as catalyzed by ——— and Fe(II) (Bowers et al.) 249
Complexes,
calculation of differential pulse polarographic curves for the reduction of ——— (Castleberry et al.) 1
Copper,
observation of morphological relaxation of ——— and silver electrodes in solution using a quartz microbalance (Schumacher et al.) 127
Cytochrome *c*,
redox behavior of ——— immobilized into a lecithin monolayer and deposited onto SnO_2 by the Langmuir–Blodgett technique (Yokota et al.) 289

Differential pulse polarographic curves,
calculation of ——— for the reduction of complexes (Castleberry et al.) 1

Ethylene glycol,
electrocatalytic oxidation of ———. Part III. In-situ infrared reflectance spectroscopic study of the strongly bound species resulting from its chemisorption at a platinum electrode in aqueous medium (Hahn et al.) 169

Ferricenium cation,
transfer of ——— across water/organic solvent interfaces (Hanzlik et al.) 303
Finite elements digital simulation,
effects of resistance and capacitance on the

chronoamperometry of polymer-coated electrodes, as modeled by a ——— (Yap, Durst) 11

Gibbs energy,
standard states and standard adsorption ——— of substances at electrode interfaces (Jastrzebska et al.) 21

Gold,
an investigation of the sulphur(−II)/sulphur(0) system on ——— electrodes (Buckley et al.) 213

Hydrogen,
mixed pseudo-potential approach to the on-top chemisorption of atomic ——— on the (100) silver surface (Illas et al.) 29

Hydrogen peroxide,
dealing with unequal diffusivities among reactants in kinetic studies at rotating disk and ring–disk electrodes. The reduction of ——— as catalyzed by Co^{II}(cyclam) and Fe(II) (Bowers et al.) 249

Infrared reflectance spectroscopy,
electrocatalytic oxidation of ethylene glycol. Part III. In situ ——— of the strongly bound species resulting from its chemisorption at a platinum electrode in aqueous medium (Hahn et al.) 169

Infrared reflection–absorption spectroscopy,
prospects for transient ——— of adsorbed species on electrode surfaces: cell design for a laser source (Roe et al.) 293

Ion-pair effects,
——— on the electroreduction and electrochromic properties of *ortho*-chloranil in dipolar aprotic solvents (Desbène-Monvernay et al.) 203

Iridium,
an ———-based mercury-film electrode. Part I. Selection of substrate and preparation (Kounaves, Buffle) 53

Iron(II),
dealing with unequal diffusivities among reactants in kinetic studies at rotating disk and ring–disk electrodes. The reduction of H_2O_2 as catalyzed by Co^{II}(cyclam) and ——— (Bowers et al.) 249

Laser source,
prospects for transient IR reflection–absorption spectroscopy of adsorbed species on electrode surfaces: cell design for a ——— (Roe et al.) 293

Lecithin,
redox behavior of cytochrome *c* immobilized into a ——— monolayer and deposited onto SnO_2 by the Langmuir–Blodgett technique (Yokota et al.) 289

Liquid chromatography,
electrochemical detection for ——— using the wall-jet cell/ultramicroelectrode detector (Khoo et al.) 115

Membrane transport,
——— associated with double-layer charging of polymer modified electrodes (Lange, Doblhofer) 241

Mercury-film electrode,
an iridium-based ———. Part I. Selection of substrate and preparation (Kounaves, Buffle) 53

Nafion,
study of the superselectivity of ——— perfluorosulphonic membranes (Lindheimer et al.) 71

Platinum,
electrocatalytic oxidation of ethylene glycol. Part III. In-situ infrared reflectance spectroscopic study of the strongly bound species resulting from its chemisorption at a ——— electrode (Hahn et al.) 169

Polymer-coated electrodes,
effects of resistance and capacitance on the chronoamperometry of ——— as modeled by a finite elements digital simulation (Yap, Durst) 11

Polymer modified electrodes,
membrane transport with double-layer charging of ——— (Lange, Doblhofer) 241

Poly-*p*-phenylene,
anodic overoxidation of ——— in aqueous electrolytes (Beck, Pruss) 157

Propylene carbonate,
the single crystal metal–non-aqueous solvent interface. Underpotential deposition of Cd on Ag (111) in ——— (Xing et al.) 261

Quartz,
observation of morphological relaxation of copper and silver electrodes in solution using a ——— microbalance (Schumacher et al.) 127

Self-diffusion coefficients,
new possibilities for obtaining more accurate results of ——— by adapting the capillary tube technique (Molenat) 89
Silicon,
taking advantage of liquid ammonia to control the surface modification of ——— electrodes (Guyomard et al.) 101
Silver,
mixed pseudo-potential approach to the on-top chemisorption of atomic hydrogen on the (100) ——— surface (Illas et al.) 29
Observation of morphological relaxation of ——— electrodes in solution using a quartz microbalance (Schumacher et al.) 127
The single crystal metal–non-aqueous solvent interface. Underpotential deposition of Cd on ——— (111) in propylene carbonate (Xing et al.) 261
Standard adsorption Gibbs energy,
standard states and ——— of substances at electrode interfaces (Jastrzebska et al.) 21
Sulphur,
an investigation of the ———(−II)/(0) system on gold electrodes (Buckley et al.) 213
Superselectivity,
study of the ——— of Nafion perfluorosulphonic membranes (Lindheimer et al.) 71
Tin dioxide,
redox behavior of cytochrome *c* immobilized into a lecithin monolayer and deposited onto ——— by the Langmuir–Blodgett technique (Yokota et al.) 289

Ultramicroelectrode,
electrochemical detection for liquid chromatography using the wall–jet cell/——— detector (Khoo et al.) 115

Wall–jet cell,
electrochemical detection for liquid chromatography using the ———/ultramicroelectrode detector (Khoo et al.) 115

Xanthosine,
electrochemical oxidation of ——— (Tyagi, Dryhurst) 137

Zirconium,
response to pH of an electrode made up of a monocrystal of α-$Zr(HPO_4)_2 \cdot H_2O$ (Palombari, Casciola) 283
